Dallas, TX (Open to Relocation) | 561-400-2543 | zach.slafsky@gmail.com

Skilled Product Manager with expertise in agile methodologies and a track record of successfully developing mobile and web apps to support and engage clients. Strong collaborator who excels at working with teams, stakeholders, and vendors to define product vision, strategy, and roadmap.

## Skills

Agile Product Management | Jira | Asana | Confluence | Roadmapping | Product Requirements

## Professional Experience

### Goldman Sachs - Asset & Wealth Management

Associate - Product Development Analyst, Irving TX (April 2018 - January 2023)

*United Capital Acquisition to Goldman Sachs in July 2019*

- Assisted in the development of a new dedicated web application that boosts the productivity of Goldman Sachs Asset & Wealth Management advisors and support personnel in catering to clients by streamlining operations, ultimately enhancing overall customer service.
- Spearheaded the development of the Goldman Sachs Asset & Wealth Management mobile app, with a focus on delivering a user-centric experience that empowered clients to manage their finances with ease.
- Collaborated with stakeholders and designers to create Minimum Viable Products (MVPs) for multiple products and drove designs through the product life cycle to release.
- Managed and formed cross-functional teams involving Legal, Compliance, Marketing, Training, and Engineering (UI, Database, and QA) departments to ensure successful product launches.
- Authored user stories and test cases for assigned products, leading User-Acceptance Testing to ensure products met our goals.
- Oversaw the management and prioritization of the bug backlog by working closely with support staff and engineers to swiftly resolve issues.
- Conducted interviews and feedback sessions with end-users, continually improving the quality of our products.
- Developed product roadmaps and effectively communicated them to stakeholders and upper management.
- Coordinated with vendors to integrate different functionalities within our applications.
- Collaborated with multiple teams during quarterly Program Increment planning, effectively planning roadmaps and identifying cross-team dependencies.
- Mentored new team members on our product and application functionalities to ensure seamless onboarding.
