---

## PROFILE

I am a Computer Science Engineer with 3 years of experience in software development. I have experience in using languages such as C# and Javascript, as well as popular frameworks and libraries like React and Node.js. Additionally, I have knowledge in databases and SQL query handling. My experience includes working on various software development projects, where I have gained valuable skills and knowledge in these technologies. I am passionate about leveraging my technical abilities to deliver high-quality solutions and contribute to the success of innovative projects.
