## EMPLOYMENT

**Yellowbrick Financial** · Full Stack Software Engineer · Remote · Apr. 2023 to Current
Yellowbrick Financial is a financial planning firm that helps clients plan and manage all aspects of their financial lives, from investments to taxes to retirement.

- Created a dynamic client-response based form using React that allows financial advisors to accurately capture client's insurance information by 40%.
- Used object-oriented programming (OOP) principles to design and implement C# code that is modular, reusable, and maintainable.
- Developed RESTful APIs and web services using ASP.NET Web API and ASP.NET Core for seamless integration with front-end systems.
- Engineered complex stored procedures in SQL using Joins, Primary Keys, Foreign keys, and Pagination to capture and display data using T-SQL while testing them with Postman.
- Implemented and maintained application data integrity through meticulous front-end validation, back-end model binding , normalization for stored procedures in the SQL database.
- Adopted content management techniques, such as sorting, filtering, routing, and mapping components, to enhance the user experience.
- Utilized Git and GitHub for source and version control, ensuring efficient collaboration and code management.
- Established applications within a team using Agile methodologies, such as daily stand-ups, code reviews, and code talks, to facilitate effective communication and collaboration within the team.

**TD Private Client Wealth** · Financial Advisor · Boca Raton, FL · June 2018 to Apr. 2023

- Established rapport with new clients through personal, face-to-face approach that foster trust and highlight the value of individualized service.
- Provided investment guidance to clients based on their needs and objectives, and propose suitable investment solutions for each client.
- Coordinated portfolio reviews with clients to regularly evaluate their investment's performance toward achieving documented long-term financial goals.
- Collaborated with the analyst team to analyze the market trends and suggest plans to clients to mitigate risks and enhance the overall return on investments.
- Worked closely with team members, peers, and managers to identify and develop new growth opportunities for asset management & client resolution.
- Utilized my relationships with business partners to tailor to the client’s financial needs and create cross-sell opportunities for the organization.
- Managed a team of Licensed Bankers and coached them on how to implement effective sales strategies and build rapport with clients.
- Continuously grew my knowledge and skills by attending seminars, webinars, and courses on investments, insurance, industry regulations & trends.
