## PROFILE INFO

Senior Full stack / WordPress developer based in Ann Arbor, Michigan. With over 10 years of experience in designing and building responsive web and mobile applications. Proficient with WP, JS and their frameworks. With extensive knowledge and understanding of UI / UX.

Notable achievements include boosting the conversion rate of an existing website with improved code and design while driving projects forward as the development team lead using agile methodologies.

## WORK EXPERIENCE

### Finch

2018 - 2023

#### Web Developer

At Finch most of my development experience was front-end related but I was given some great opportunities to work and grow as a Full stack developer. They are currently serving multiple clients of various magnitudes. Because of the diversity of Projects, it enabled me to wear multiple hats and learn more about the different domains of web development.

I also worked closely with the management team to ensure that all Agency specific protective measures were in place, such as version controlling, monthly backups and technical documentation and collateral clean up.

- Custom web pages and custom functionality using jquery and JS
- Worked with Class based components as well as Functional components
- Created RESTful APIs
- Worked on both relational and non relational Databases
- Experienced with Node.js
- Understanding of cloud based hosting services
- Worked with various FE and BE libraries
- Ticket creation and Basic SCRUM mastery
- Worked with Various third party integrations
- Version Controlling and application deployment using Git platforms
- Ticket management and project documentation using Atlassian products such as Jira and Confluence

FULL STACK / WORDPRESS DEVELOPER

## Matchbox Design Inc

2015 - 2018

### Web Developer

Matchbox Design Inc is a digital agency that works with a range of clientele. I was part of a 6 people team that included the Manager, and I was working on multiple WordPress projects based on client requests submitted via Zendesk, then converted to Asana.

Although I was primarily a Wordpress Developer, I would occasionally be reassigned to work on E-commerce projects in Shopify.

- Closely worked with the design team to ensure pixel perfect conversions of PSD, Illustrator and XD to Static web pages.
- Built out custom Static pages using HTML CSS
- Pixel perfect design using
- Worked in Elementor Pro and Divi Builder
- Experienced with Themes and their customization.
- Worked on both pre built solutions and administered custom Websites
- Experienced with Plugins and their development
- Worked on E Commerce sites and helped build E-Commerce sites from
- Scratch using Shopify and WooCommerce.
- Integrations of third party entities such as payment gateways etc.
- Ensuring website stability via monthly website maintenance runs where we would backup and update outdated web assets.

## FREELANCE PROJECTS

### iLet Pro

Designed and developed web pages using with DHTML, CSS3, Ajax, Bootstrap, PHP and jQuery. All of which is based on the W3C and Web standards.

- Created the UI interface using JavaScript, jQuery and CSS3.
- Worked on application development using HTML/CSS, Javascript and YiiFramework.
- Concrete knowledge of jQuery and Ajax that make websites more appealing and user friendly.
- Created bunch of web applications using different frameworks like
- Codeigniter, YiiFramework with Bootstrap.
- Implemented and tested the enterprise application with jQuery, and Spring- MVC.
- Implemented the Drag and Drop functionality using jQuery framework.
