Senior Web Developer

Hey there! I'm Rizwan, a Senior Web Developer from Chicago, IL..

I get excited about wearing multiple hats, taking on more ownership and responsibility and building something awesome in my next role.

As a Web Developer, I love to plan, research and execute applications that will make a difference, for the company and people who will be using the software on a day to day basis. It's not just about writing some amazing reusable code, it's about the entire process and delivering on a promise and idea.

I'm available anytime for an interview.

📍 Chicago, IL

🎓 **EDUCATION**

University of Chicago
Bachelor in Computer Science - Information Technology
September 2006 to April 2010

Summary

I'm seeking a lead position as a Senior Web Developer at an organization who can benefit from the 12 years of related experience I gained at some well-known companies such as Yoga International and TOP Agency. In my next role I would like to continue to learn and grow as a professional and take on more responsibility and work towards being in a position where I might be able to manage a small team of developers.

Skills

React.js	PHP	WordPress
React Native	CodeIgniter	WooCommerce

Vue.js	CSS3	Git
AngularJs	SASS	Bitbucket
RESTful Web Services	LESS	Docker
JSON	Material	Photoshop
GraphQL	Webpack	Sketch
JQuery	Bootstrap	Adobe XD
Green Socks	Foundation	Adobe Illustrator

Experience

Yoga International

FULL STACK DEVELOPER
Chicago, IL
Dec 2018- Current

Overview
Yoga international streams hundreds of expertly led yoga & meditation classes on all devices such as web, mobile and TV app. The web app is built in React, Node and GraphQL, the mobile app is built using material UI and React Native. All of this includes integration from multiple third party applications such as algolia, biblio and is deployed on AWS. The app had offline and live classes like yoga and meditations with feature of push notifications to notify users about upcoming new or live courses. Below are the duties I am responsible for:

- Led a team of 6 for the regular maintenance and addition of features using Javascript and it's modern frameworks and libraries such as React, typescript.
- Managed, and implemented scalable, global, enterprise-level software solution for yoga classes and courses.
- Spearheaded the migration from PHP expression engine to modern javascript, react, react native/ GraphQL.
- UX flows, design and implementation.
- Reviewed Pull requests.
- Interacted with testing team, for fixing the Issues.
- Interacted with design teams for ui feedback.
- Provided training and mentor other engineers when required.
- Developed most effective technical solutions to meet business requirements.

TOP Agency

WEB DEVELOPER
Chicago, IL
Aug 2014 - Nov 2018

Overview
We're the only Chicago marketing agency with a proven track record of utilizing systematic experimentation, measurement, and optimization to grow businesses across all of Chicago's growing list of industries.

- Optimized components for maximum performance across a vast array of web-capable devices and browsers
- Designed and built new, high-quality, high-performance web-based applications and tools
- Wrote well-documented, reusable, and transferrable code
- Developed rich client UI applications with JavaScript and libraries like AngularJS, React, jQuery and Bootstrap that utilize RESTful Java back end web services
- Used tools including GIT, npm, sonar, Javascript, VueJS, and Typescript on projects
- Solved complex architectural challenges when implemented new features
- Developed features using mockups from the design team
- Deployed using our automated building and testing processes
- Participated in peer-reviews of solution designs and related code
- Developed and implemented highly-responsive user interface components using React concepts
- Built HTML email templates, tested compatibility with multiple email clients, and prepared files for review and delivery through third-party vendors or web-based email tools

Fast Radius

FRONT-END DEVELOPER
Chicago, IL
June 2010 - July 2014

Overview
Fast Radius is on a mission to change manufacturing and logistics for the better. We've combined our Cloud Manufacturing Platform™ and our expert team to make the entire process smarter and easier. We're making new things possible in manufacturing so you can make new things possible for the world.

- Built reusable components and front-end libraries for future use
- Created and maintained core templates used across our numerous Marketing Automation, Content Management, and Email systems
- Converted brand and creative visions into responsive code to be used across multiple clients and browsers
- Worked with different development and QA teams to code HTML/CSS/JavaScript interfaces, tested, and verified projects through deployment processes
- Built responsive web elements that ran well across multiple devices and web browsers.
- Developed web functionality according to business and architecture requirements
- Participated in brainstorming and other idea-generating team sessions
- Assisted in designing and planning of the platform architecture
- Packaged and supported deployment of software releases
- Effectively built software solutions given advice about the interfaces and algorithms used using preliminary understanding of application lifecycle, databases, and application services
- Helped ensure we have a smooth software pipeline for continuous and fast delivery
