

Ritishwar Reddy Enja

(469)-753 0032 | ritishwarreddy773@gmail.com

Professional Summary

- Experienced Full Stack Developer with 3+ years of expertise, seeking a dynamic role in an innovative organization to drive business growth through cutting-edge solutions.
- Proficient in a wide range of front-end and back-end technologies, including JavaScript, HTML/CSS, React, Node.js, and various databases.
- Demonstrated expertise in crafting visually appealing and responsive user interfaces, ensuring seamless user experiences and increased engagement.
- Extensive knowledge of React, a powerful JavaScript library, enabling the creation of dynamic and interactive interfaces with exceptional performance and scalability.
- Strong problem-solving skills, utilizing analytical thinking and troubleshooting abilities to resolve complex issues efficiently and minimize system downtime. Proficient in database design and management, utilizing SQL and NoSQL databases to efficiently store and retrieve data.
- Effective collaborator, adept at working with cross-functional teams of designers, developers, and stakeholders to ensure smooth project execution and timely milestone delivery.
- Sound understanding of databases, including both SQL and NoSQL, facilitating efficient data storage, retrieval, and manipulation for optimal application performance.
- Committed to continuous learning and keeping up-to-date with the latest industry trends and best practices, leveraging new tools and techniques to enhance the development process.
- Proven track record of delivering high-quality software solutions that meet or exceed client expectations, resulting in positive feedback and long-term partnerships.
- Participated in team training sessions and knowledge sharing, fostering a culture of continuous learning and growth.
- Demonstrated ability to troubleshoot and resolve complex technical issues, ensuring uninterrupted application functionality.

Skills

- **Programming Languages:** Java, C#, ASP.Net, VB.Net, Python, HTTP, Typescript, PHP
- **JS Frameworks:** React, Angular, Vue, Node Js, Bootstrap 5, JQuery, Express Js
- Web Applications, Selenium, WebGL
- Performance Improvements, Visual Studio
- Testing and Deployment, RDF/RDFS/OW
- Agile/Scrum Methodology
- Standards & Trends: DSA(Data Structure and Algorithm)
- **Source and Version Control:** Git, Github
- Amazon Web Services
- Software Components and Libraries
- **Databases:** Oracle 8i, MongoDB
- Testing and Debugging
- Software Development Lifecycle
- Azure DevOps, Git Version Control
- **Operating System:** Windows 2000/2003/2008/XP/Vista, Win 7, UNIX, Linux
- **Web/ App Servers:** IIS 7.0/6.0

Experience

Full Stack Developer
Verizon Wireless Systems

Jan 2023 - Current

- Enhanced user experience and usability by developing and implementing an HTML/CSS UI upgrade for

a server maintenance software utility.

- Implemented validation rules in a Spring MVC application to ensure data integrity and accurate user input
- Automated Increased engagement by integrating Angular into web applications, enabling real-time, two-way communication.
- Hands-on development of new, user-facing features using React.js, back-end services using Node.js, , and participating in code reviews
- Streamlined software development processes through automated CI/CD pipelines, ensuring efficient and timely updates.
- Developed secure single-page applications with Angular, providing reliable authentication and seamless data retrieval
- Created a J2EE application to identify outdated data during migration, preserving data accuracy and integrity
- Developed and managed responsive online applications using React, Node.js, and MongoDB, resulting in improved user experience and increased client satisfaction
- Utilized Jest and Selenium automated testing frameworks to provide thorough test coverage and quick delivery cycles, maintaining software quality

Full Stack Developer

Dec 2018 – Jul 2021

Coforge

- Created responsive user interfaces using HTML5, CSS3, JavaScript, jQuery, Bootstrap, Angular 9, and React.js, utilizing the latest frontend technologies for interactive user experiences
- Developed efficient RESTful web services utilizing JSON for seamless client-server communication.
- Integrated AWS S3 for simplified and reliable project artifact deployment.
- Utilized Apigee to expose RESTful and SOAP APIs, simplifying integration with external systems.
- Leveraged GIT (GitHub) for distributed version control, enabling efficient code collaboration and traceability.
- Deployed applications in scalable and cost-effective cloud architectures using IaaS, SaaS, and PaaS solutions.
- Improved functionality and performance by developing software systems in JavaScript and Groovy.
- Automated CI/CD procedures using Jenkins and UNIX Shell scripts, resulting in faster and more reliable software releases.
- Achieved smooth hybrid cloud capabilities through OpenStack API integration with AWS EC2.
- Created responsive and interactive user interfaces using HTML5, CSS3, JavaScript, jQuery, Bootstrap, Angular 9, and React.js, following a component-based architecture and utilizing Node.js for efficient development.

Education

University of Texas at Dallas – Master's

SRM University - Bachelor of Technology

Computer science Engineer
