EXPERIENCE

Finance of America Companies
RPA Developer November 2021 – Present

- Assisted the access management team in completing the quarterly SOX audit by automating the User Access Review, the automation was a critical part of completing the audit by the deadline.
- Established automated regression tests using UiPath Test manager, reducing the number of bugs at release.
- Contributed to team projects using GitHub for version control.
- Created reusable code libraries for websites, desktop applications, and Citrix applications.
- Assisted in training of non-developers in UiPath.
- Worked with databases such as SQL and UiPath data services.
- Developed end to end automations from creating solution design documents, developing the automation, performing end to end testing, and deploying the automation
- Collaborated effectively within an Agile team, contributing to iterative development cycles, fostering open communication, and embracing a dynamic work environment to deliver high-quality software solutions on time

ALG Worldwide Logistics
RPA Developer & QA Analyst May 2020 – November 2021

- Delivered over 15 attended automations that saved over 3200 FTE hours per Year.
- Able to work with business contacts to deliver on requirements.
- Performed QA testing for all automations.
- Developed best practice guidelines for junior developers.
- Gathered the acceptance criteria for automations from the process owners.
- Helped to drive the Automation initiative within the company and gain the confidence of upper management in automation.

Duke Energy Florida – External Affairs
Intern May 2017 – December 2019

- As a college intern I had various office responsibilities including maintaining contact information and completing and filing expense reports for multiple employees.
