Summary:

I am a data analyst with 4 years of experience in the logistics, manufacturing, and transportation domain.

Technical Skills:

- AWS Redshift, Snowflake, BigQuery, MySQL, Oracle SQL, DBeaver, Power BI, Tableau, Advanced Excel, PowerPoint
- SAP, Salesforce, ERP System, Blue Yonder, BluJay, IBM's AS/400 System
- Lean Six Sigma Certified

Job Experience:

CHEP

Data Analyst   March 2022 – Current

- Conduct data analysis, cost analysis, forecasting, and implement alerting automations across our various shipping lanes, regions, clients, and storage facilities.
- Present and discuss my findings with the representatives in each department in Sales, Marketing, Accounting, and Logistics, and discuss the problems that the data tells us about their organization and how we can solve them
- Develop strategy to optimally plan the paths that trucks take to deliver their loads of products.
- Analyze, create, and maintain key trends, dashboards, and reports, enabling effective performance monitoring and recommending improvement strategies.
- Lead weekly meetings with the Transportation team to discuss their costs so that they can leverage these conversations with their work to negotiate for better rates with shipping companies.
- Different teams in our company use different technologies, so I was lucky enough to learn how to use technologies like AWS redshift, Snowflake, MySQL, Oracle, and Tableau, depending on which team's data I was working with.

American Builders Supply

Systems Analyst   August 2021 – March 2022

- Mass - entered orders for building companies while utilizing the stock availability and on-hand inventory

- Had meetings and emails with customers on a daily basis to go over the orders and shipping process and made sure all orders are entered in the system Audited inventory with general manager, builders, and manufacturers to plan for upcoming shipments
- Planned orders and scheduling work on my own pace to meet/exceed the allocation per week

Crete Carrier Corporation

Operations and Customer Networking Analyst   December 2020 – August 2021

- Collaborated with operations managers to assign drivers to the shipments based on locations, distance, and reached out to drivers directly about the assignment
- Cleaned, processed, and analyzed data in Excel which allowed us to communicate logistical information about mileage and optimal lane
- Presented Linear Regression Models, Pivot Tables and suggestions based on the analysis and factors that affect the productivity and analyze opportunities for improvement
- Negotiated and placed bids for loads on the Freight Auction
- Partnered with Customer Service Representatives to communicate on any ongoing issues as appropriate involving calculating spot rates and fuel service charge for interested bid loads.

Ameritas

Marketing Project Intern   January 2019 – Dec 2020

- Planned and created innovative marketing strategies based on surveys and extensive research for engaging education experiences regarding financial wellness and literacy for young generation and diverse populations
- Reported executive summaries and white papers to the Chief Marketing Officer, Lead Business Analyst, and Innovation Analyst

Education:

- The University of Nebraska-Lincoln
- Bachelor of Science in Business Administration
- Major: Supply Chain Analytics
- Minor: Finance
- Dean's List: Fall 2020 & Spring 2020, 2021
