PERSONAL SUMMARY

I'm a Full Stack developer having experience of over 5 years and have developed large scale mobile applications using JavaScript, ES5/ES6, TypeScript, React Native, Node.js. I also worked on GraphQL, Storybook, Jest and Firebase, MongoDB.

I have successfully constructed/revamped numerous mobile applications along with contributing to development of various web applications. I strongly believe in building and maintaining relationships with people. I work for and work with a passion for UI/UX centered development using modern technologies and techniques, I feel encouraged to further explore and excel in a promising yet challenging role taking my career ahead.
