Summary

An experienced RPA Developer with UIARD Certification from Belfast, Northern Ireland currently based within Aberdeen, Scotland. With 4 years development experience tied to the RPA space I have successfully launched, deployed and maintained several bots to happy and enthusiastic clients. In the previous two years I have been taking up a more senior role helping clients navigate through the RPA process, keeping them engaged and in the loop from discovery through to deployment.

Skills:

Public Speaking, Organization, Time Management, Delivering against time schedules, Leadership, Innovation, Client engagement, Teamwork, Client Communication, Business Relation, Documentation, Support Documentation, Analytical mind, Critical Thinker, Problem Solver.

Education

• University of Dundee

2:1 BSc (Hons) Applied Computing (2015-2019)

Honors Project in Virtual Reality

Employment History

• RPA Developer at FDIIntelligence (October - 2021 to Present)

- Create and maintain bespoke automations against Clients specifications
- Develop required documentation for assisting in the development process
- Responsible for several bots within the hotel industry in the UK.
- Relaying with Clients on a regular basis in the form of reports and weekly calls.

• Graduate Software Developer at Xeretec LTD (March 2020 - October 2021)

- Responsible for updating and maintaining ServiceNow platform
- Provide updates and build upon current UK wide printer software solutions
- Helped to spearhead the creation of RPA within Xeretec

Non-related Projects

• A Historical Time-Capsule for Educational Purposes Through the Medium of VR

Year long project running September 2018 - June 2019

This project was my honors project for my bachelor's in my final year of university. The project was a virtual reality application developed in Unity with C# scripting which sought to recreate historical moments and scenarios and put the user in the shoes of people at the time.

• HerbWorth - World of Warcraft LUA addon

2018 - 2020 (Patch 8.0 - 8.3 / 2018-2020)

Herbworth, like many addons developed for World of Warcraft, has been a side passion project which managed to reach a few thousand users. HerbWorth was an addon designed to amalgamate information about herbs value on the marketplace from information gathered by another addon, TSM. HerbWorth reached a download user base of 2000 throughout its span, with changes to twitch addon client Herbworth was removed until it would comply with WoWup addon guidelines in early 2020.
