Professional Certificates

IBM Business Intelligence Analyst Professional Certificate	April 2024
Tableau Advanced Data Visualization	April 2024
Business Analytics Specialization -UPENN(Ivy league)	April 2024
Google Business Intelligence Analyst Professional Certificate	Anticipated Certification May 2024

Projects

Tableau Project- In this project scenario I was employed as a data analyst for a company and I was told to produce a report to determine whether demographic, regional, and economic characteristics lead to a better life. In the project I import and clean data, and create interactive visualizations, hierarchies, insightful stories, and interactive dashboards.

IBM Clean and Analyze Data Project- Using excel for data cleansing to remove empty rows, duplicate records and spelling. Sorting and analyzing data by creating and using pivot tables that will be used to visualize in a dashboard.

IBM Cognos and Analytics Project - Creating dashboards for data visualization on excel and IBM cognos analytics. I also created column charts, tree maps, and bar charts to capture KPI metrics.

Microsoft Access Database Project-
· Building a database system for high school student council
· The database will make it easier to send organizations how many hours each student completes
· The database system tracks the number of volunteer hours for each person electronically rather than having to go back and look at the signatures of each person for all their time spent doing community service
· Using ERD , queries, relationships, primary key
· Using SQL and VLOOKUPS to create tables and scripts for the database structure
· Implement CRUD operations using SQL

Skills

- Data mining and Data cleansing
- Data analysis

- Data wrangling
- Microsoft excel
- Relational Databases
- Python
- Tableau
- MySQL
- PostgreSQL
