PROFILE

Versatile software engineer with 5+ years of experience creating applications across various programming languages, specializing in native iOS and Android development. Skilled in data analysis, project management, and engineering supervision, with a strong focus on software engineering. Committed to exceeding expectations and adding value to any team.

PROJECTS

BEAUTY SYNC • FLAGSHIP PRODUCT

Beauty Sync is a cutting-edge mobile application designed to empower beauty enthusiasts, influencers, and professionals. Features include REST API Usage with Stripe for Full Cycle Payment Solutions and Kaltura Video Management, Video and Image Scrolling, Robust Data Framework capable of withstanding millions of users, search, and feed filtering. | GitHub iOS: <https://github.com/mjmuhamm/beautySync>
GitHub Kotlin: https://github.com/mjmuhamm/beautySync_A

TAÏSTE • FLAGSHIP PRODUCT

A dedicated social media platform crafted exclusively for chefs, catering professionals, personal chefs, and meal kit service providers. Features are similar to Beauty Sync. | Viewable: <https://www.youtube.com/watch?v=IJcyFOjIGEI> | GitHub iOS: https://github.com/mjmuhamm/taiste_ios | GitHub Kotlin: https://github.com/mjmuhamm/taiste_android

THE POS • FLAGSHIP PRODUCT

A comprehensive desktop application tailored for food service companies, including restaurants, cafes, food trucks, catering services, and meal delivery businesses, in effort to automate point-of-sale functionality and comprehend in-depth market analysis across business units. *Not Yet Complete* | GitHub: <https://github.com/mjmuhamm/POS>

HOPE SOUTH FLORIDA • CONSULT

A nonprofit mobile application dedicated to supporting individuals and families experiencing homelessness in the Florida community. The app serves as a centralized hub, connecting users with essential services, programs, and resources to empower them on their path to stability and self-sufficiency. | GitHub: https://github.com/mjmuhamm/hopeFoodCount_ios
