## EXPERIENCE

### **Reef Xplorer LLC., Houston (Remote)** **Sr. Business Analyst**

**December 2015 – Present**

- Proven expertise in developing and managing PMO processes to ensure seamless alignment with organizational objectives, project timelines, and stakeholder requirements.
- Analyzes and documents current business processes, providing business analysis guidance on security requirements throughout the SDLC and application development phases.
- Good understanding of Data cleansing, data mining, data governance, data modeling
- Serves as Project Manager for rental services offered to charter yachts and hotel beach clubs, leading the development of a watercraft B2B and B2C marketplace. This project utilized IoT technology to collect watercraft usage data, integrated with Argis maps to provide tourists with points of interest and real-time watercraft locations. Established KPIs, built the project team, managed the budget, and conducted weekly status reviews with team leaders.
- Acts as Product Owner for the Water Adventures B2B2C marketplace, leveraging Agile methodologies to foster collaboration across teams, drive development, and manage business epics and user stories for the software development teams.
- Aligns priorities with IT and business leadership, coordinating with IT Software Engineering to create or update software based on business needs.
- Oversees end-to-end implementation of projects, from inception to completion, while training company employees to use the software effectively in their daily roles.
- Analyzes and manages third-party vendor relationships, optimizing hardware integration with the marketplace to ensure efficiency and compatibility.
- Leads budgeting efforts, ensuring financial resources align with project timelines and objectives.
- Conducts business analysis to support watercraft sales, ensuring alignment with customer needs

and market trends, and develops strategic partnerships with hotels and charter yacht companies to expand business opportunities.

- Utilizes various data analysis and organization tools to uncover impactful insights, creating and presenting reports to executive team members and stakeholders for data-driven decision-making.

#### **HCL America, Dallas, TX**
