ABOUT ME

As a Senior Full Stack Developer based in Niles, I have over a decade of experience with **WordPress**, **JavaScript**, **PHP**, **Laravel**, **Node.js**, and strong **UI/UX** design.

I excel in both front-end and back-end development, including **MySQL**, **PostgreSQL**, **RESTful APIs**, and managing **CI/CD** pipelines with **AWS** and **Docker**.

In my next role, I aim to drive innovation, deliver impactful solutions, and implement scalable, high-performance architectures.

EXPERIENCE

Syndigo 

SOFTWARE ENGINEER

SYNDIGO | 2021 - 2024

Syndigo, a renowned leader in **SaaS** Commerce Data Management Solutions, provides product content solutions to retailers and brands. At **Syndigo**, I was able to work on large-scale SaaS products. This experience enhanced my skills across various tech domains, including **PHP**, **Laravel** and **JavaScript** frameworks and equipped me to tackle complex challenges.

- Developed cloud-based **SaaS** products using **PHP**, **Laravel**, and **JavaScript** frameworks.
- Led **UI/UX** design and implementation for enhanced web features.
- Engineered real-time data analytics features using **JavaScript** frameworks like **React.js**.
- Implemented **front-end** development using **JavaScript** frameworks such as **React**, **Vue**, and **Angular** to enhance user interface responsiveness and functionality.
- Managed migrations from **PHP** to modern **JavaScript** frameworks like **Node** and **Angular**.
- Enhanced user authentication processes for cloud-based **SaaS** applications.
- Developed customized backend systems using **PHP** and **Laravel** to improve product scalability and reliability.
- Optimized database queries to enhance performance and data retrieval efficiency in **SaaS** products.
- Adopted Agile methodologies to streamline project workflows to ensure timely delivery and continuous improvement.

 **Foxbox Digital**

FULL STACK DEVELOPER

FOXBOX DIGITAL | 2018 - 2021

At **Foxbox Digital**, my primary development experience was in **front-end** work, but I had some excellent opportunities to expand my skills as a **full-stack developer**. The company serves a wide range of clients with varying needs, which allowed me to take on different roles and gain a deeper understanding of various aspects of web development. This diversity in projects helped me broaden my expertise across multiple domains.

I collaborated closely with the management team to ensure the implementation of essential agency-specific protective measures. This included version control, monthly backups, and the organization and maintenance of technical documentation and collateral.

- Developed dynamic web applications using **JavaScript** frameworks (**React.js**, **Vue.js**, and **Angular**) to improve the user experience.
- Managed application state using **Redux**, ensuring smooth data flow and performance.
- Utilized **WebSocket** for real-time communication between clients and servers in web applications.
- Integrated **RESTful APIs** and **GraphQL** to streamline data fetching and server interactions.
- Collaborated with **UX/UI** designers to translate designs into functional web components.
- Configured and maintained **webpack** and **Babel** for efficient asset compilation and bundling.
- Deployed web applications on **AWS** and **Google Cloud** for scalable and reliable performance.
- Conducted code reviews, provided mentorship, and ensured adherence to best practices and standards.

WEB DEVELOPER

BUBBLEUP | 2014 - 2018

Bubbleup caters to a diverse clientele as a digital agency. Within a six-person team, including the manager, I worked on numerous **WordPress** projects, applied my expertise in **HTML**, **CSS**, **JavaScript**, and **PHP** to customize themes and plugins based on client specifications. Utilizing Git for version control and ensuring cross-browser compatibility were also key aspects of my role. Client requests, initially submitted via **Zendesk**, were efficiently managed as tasks in **Asana**. Additionally, I focused on optimizing website performance and enhancing user experience.

- Developed custom **WordPress** themes and plugins using **PHP**, **HTML**, **CSS**, and **JavaScript**.
- Leveraged **WordPress** multisite installations to manage multiple sites from a single dashboard.
- Optimized **WordPress** site performance through advanced caching techniques and image optimization.
- Built and maintained e-commerce websites on **Shopify** to enhance the user experience and functionality.
- Customized Shopify themes using **Liquid**, **JavaScript**, and **CSS** for brand-specific storefronts.
- Integrated third-party APIs into **Shopify** stores to extend functionality and streamline operations.
- Utilized **PHP** and Laravel for **robust** backend development to streamline complex workflows.

EDUCATION

University of Chicago | 2010 - 2014

BACHELOR'S OF COMPUTER SCIENCE
