SUMMARY

I am a SENIOR MEAN / MERN Web Developer with 11+ years of professional experience in developing web applications and beautiful websites from scratch. I have a Bachelor of Computer Science from the Institute of Management and Sciences. My journey as a web developer has been impressive, and I continue to grow and learn every day. I am a great fit for any startup or web agency. With my range of skills, I have the ability to take on any size project or client and deliver a product or website that meets today's web standards and expectations.

WORK EXPERIENCE

VERIZON

September 2019 to Present

SENIOR MEAN / MERN WEB DEVELOPER

Store Management Application – Houston, TX

Overview: With over 1000+ country-wide Verizon stores, Verizon required a robust store management application to manage all the stores. Built on React, Node, integrated with multiple Verizon API's, and sitting on AWS, this is an application that can fully manage all aspects of any Verizon Store, including store maintenance, audits, finding nearby contractors, and much more.

Environment: React, Redux, Express, Node, Javascript, JSON, HTML5, CSS3, AWS, Verizon API's, Google Maps, Photoshop, Git, Agile, Webpack, RESTful API's, Jest/Enzyme.

WAYFAIR

May 2014 - Aug 2019

FULL STACK WEB DEVELOPER

Employee Management System - Houston, TX

Overview: Wayfair required a dedicated system to manage Wayfair's payments and facilitate prompt payment alerts. This is where WayfairPaySecure comes into play. Built on a custom PHP framework supported by JavaScript and with a user-friendly UI/UX interface, it's a Wayfair payment management tool for daily payment recoveries and sends timely reminders to customers. Moreover, I contributed to the development of Wayfair's employment management system by organizing records like personal details, salaries, and attendance.

Environment: PHP, Vanilla JavaScript / JQuery, AJAX, MySQL, JSON, HTML, CSS, Google Maps, Photoshop, Git, Agile
