PROFILE

A fast-learning, adaptable business analyst who worked on an international government project in a fast-paced environment with high demands for the best possible performance. Permanent resident and a green card holder.

EXPERIENCE

Seyfor Prague, Czech Republic

2018 - 2024

Business Analyst

- Communicated with foreign stakeholders, European Commission representatives, and end users to meet their vision and understand their needs. Translated their requirements into user stories and tasks.
- Designed business rules and features that made goods declaration processes easier and faster. Some of them were later adopted by other EU member states.
- Prepared the workload for the members of the development team for smooth agile development and coordinated frontend and backend. Organized scrum ceremonies
- Designed database structures for customs datasets and processes, using SQL.
- Wrote business and functional documentation, including documents that are used by the developers and customs officers in their work.
- Prepared testing scenarios and plans and supervised their execution.
- Managed cross-functional teams in absence of project leaders and successfully released the March 2023 ICS2 e-customs version. This was only accomplished by 6 out of 27 EU member states.
