

Haswanth Kondepati

haswanthk26@gmail.com | +1(216)- 894-2382 | Willoughby Hills, OH, 44094

SUMMARY

- Dynamic professional with 5+ years of experience in Robotic Process Automation (RPA), automation solutions, and robotics development. Proven expertise in designing, developing, and deploying end-to-end automation using UiPath, with hands-on experience in building high-performance RPA solutions and integrating systems across various platforms. Strong background in AI, machine learning, embedded systems, and robotics, with a track record of improving efficiency and accuracy through innovative automation solutions. Adept at collaborating in Agile teams, driving process improvements, and delivering scalable, maintainable automation systems.

EDUCATION

Trine University, Angola, IN | US
Master of Science in Information Science

May 2025

CERTIFICATION

UiPath Certified Professional Automation Developer

WORK EXPERIENCE

RPA Developer | ConocoPhillips | USA

March 2024 – Present

- Delivered end-to-end automation using UiPath, following best practices and design standards.
- Created high-level design documents and automation architecture for new processes.
- Automated tasks involving PuTTY, PDFs, and OCR for unstructured data extraction.
- Managed bots, queues, assets, and schedules in UiPath Orchestrator.
- Integrated front-end apps with Orchestrator using APIs and transaction queues.
- Developed custom activities and reusable components to enhance automation.
- Resolved production issues and supported ongoing bot maintenance.
- Collaborated in Agile/Scrum teams, participating in daily stand-ups and sprint planning.
- Performed code reviews, testing, and deployments using GitLab and CI/CD pipelines.
- Led efforts to standardize automation through reusable templates and assets.

SOFTWARE ENGINEER | Tech Mahindra | Hyderabad

Aug 2021 – May 2023

- Responsible for managing and maintaining guidelines for implementing end to end RPA solutions.
- Engineered end-to-end Robotic Process Automation (RPA) solutions, ensuring alignment with enterprise automation goals and implementation standards.
- Conducted detailed business requirement analysis to identify high-impact automation opportunities, optimizing manual workflows through robotic solutions.
- Translated business requirements into scalable automation solutions through stakeholder collaboration.
- Created and maintained essential documentation including PDDs and SDDs.
- Designed modular, reusable workflows following UiPath best practices and engineering standards.
- Set up and configured UiPath ecosystem (Studio, Orchestrator, Robots) for enterprise deployment.
- Built robust automations using UiPath Reframe work with advanced exception handling and data externalization.
- Managed bot provisioning, licensing, scheduling, and monitoring to ensure system stability.
- Developed maintainable, high-performance automation logic using reusable components.
- Delivered post-deployment support and implemented changes through structured version control.
- Enforced security, user roles, and governance within UiPath environments.
- Created custom activity packages to extend UiPath capabilities and streamline process efficiency.
- Actively participated in client-facing sessions for requirement gathering, QA reviews, and status reporting, maintaining technical leadership and project oversight.

Associate Software Developer | Axa XI

March 2019 – Aug 2021

- Collaborated in Agile/Scrum environment, participating in daily stand-ups and engaging with stakeholders to ensure project alignment and timely delivery.
- Experience in setting up end to end UiPath environment.
- Experience in creating High level design documents for all the new automations. Experience in handling all the
- Experience in automating database activities, Email, Excel, Pdf applications.
- Experience in create Microsoft power automate workflows from SharePoint.
- Automated Mainframe system processing using Blue Session Manager, UiPath.
- Implemented all the best practices of UiPath while developing all the automations.
- Integrated UiPath transaction queues with front end application using inbuilt orchestrator API's.
- Managed/Maintained robotic processes and schedules using UiPath Orchestrator.
- Worked on Assets, add queue item, get transaction item, Rollback through Orchestrator.
- Worked on creating custom activities.

KEY PROJECTS

Invoice Processing Automation

Overview:

- Automated the end-to-end invoice processing workflow, including data extraction from PDFs and emails, to reduce manual effort and improve accuracy.

Key Achievements:

- Developed automation using UiPath and OCR to extract invoice data.
- Integrated with UiPath Orchestrator for both management and scheduling.
- Reduced processing time by 60% and improved data accuracy to 98%.

Order Management Automation

Overview:

- Automated the supply chain order management process, including data entry, inventory updates, and delivery scheduling, to streamline operations and reduce lead times.

Key Achievements:

- Implemented UiPath Reframe Work for end-to-end automation.
- Integrated with ERP system for order processing and inventory management.
- Reduced order processing time by 50% and minimized errors by 95%.

TECHNICAL SKILLS

- | | |
|---------|------------------|
| • .Net | • MySQL |
| • HTML | • CSS |
| • Agile | • Power Automate |
| • Scrum | • Git |
