Objective

Looking for a Manual QA Tester job where I can help make software work properly by testing it carefully.

Experience

Trainee QA

19 April 2022 - 09 Aug 2022

Idea2Code Infotech LLP

Performed manual testing on Android, Web and iOS apps, focusing on key features and user flows to find bugs early.

Created and executed basic test cases based on requirements shared by the team.

Reported bugs using Google Sheets with clear steps, screenshots, and proper categorization (minor/major), helping developers fix issues quickly.

Worked with developers to check if reported bugs were fixed properly and tested again to make sure everything was working fine.

Used Postman to check basic API responses like status codes and simple data fields.

Checked UI layouts across different screen sizes to ensure proper design alignment and functionality.

Participated in daily stand-up meetings to share testing updates for smooth team communication.

Junior QA Tester

10 Aug 2022 - 30 March 2023

Technozer Solution Pvt Ltd

Manually tested various Web, Android, iOS, and gaming apps to ensure smooth functionality and a bug-free user experience.

Wrote and executed functional test cases based on real-world user scenarios to catch potential issues early.

Used Postman to test APIs and check backend responses for accuracy.

Reported bugs clearly and In-detail using Google Sheets, and followed up with developers to

make sure they were fixed properly.

Manual QA Tester

18 May 2023 - 30 June 2024

Idea to Implementation Infotech

Tested e-commerce and various types Web & mobile apps (Android/iOS), focusing on core user journeys to ensure a seamless and bug-free experience.

Designed test scenarios based on client requirements and feature specs, and executed them throughout different development phases.

Collaborated closely with developers and UI/UX designers to identify design issues and recommend improvements for a better user experience.

Used Postman to perform backend testing, verifying that API requests and responses were accurate and aligned with frontend functionality.

Logged detailed bug reports in Trello, including clear details, screenshots, and environment information.

Participated in daily stand-up meetings to share progress, align with the team, and submitted daily work updates.

Manual QA Tester

9 July 2024 - Present

Webashlar Pvt Ltd

Tested Android, Web and iOS apps regularly to make sure they worked well and didn't trouble the users.

Wrote test cases by carefully understanding how the app should work and checked every part during development.

Worked closely with developers and designers to talk about any mistakes or areas that could be made better.

Used Postman to check if the backend and frontend were talking to each other properly through APIs.

Reported bugs using ClickUp and added all the details like how to find the issue, what device was used, and screenshots to make fixing easier.

Rechecked the bugs once they were fixed and also tested the rest of the app to make sure nothing else broke.

Joined daily team meetings to share what I tested, what issues I found, and what was planned for the next day.

Gave small suggestions when I saw anything that could improve the app or make the testing process better.

Education			
Course / Degree	School / University	Grade / Score	Year
BCA	Shri Vishwanath Post Graduate College	68.89	2021

Skills
Requirement Analysis
User Perspective-Based Analysis
Test Scope Planning
User Journey validations identification
Mapping Test Scenario & Test Case
UI/UX Testing
Usability Testing Expert
Exploratory Testing
Suggestions for UX/Feature Improvements
Advertisement Testing (Interstitial, Banner, Rewarded Ads)
Hands-on with Selenium WebDriver for basic web automation tasks
Skilled in inspecting elements, writing XPath/CSS selectors for automation
Understands how to identify repeatable manual test cases suitable for automation
Basic exposure to test script creation, execution, and result validation
Familiar with running automation scripts and tracking results in reports
Basic idea of creating and maintaining test scripts
Able to perform end-to-end functional testing of REST APIs
