

Ranjith Yeruva

Mobile: +1 2012688886

E-Mail: yeruvaranjith3@gmail.com

A highly competent and results oriented RPA Developer with 10 years of working experience in Software Development (.Net), with excellent leadership and excellent communication skills. I am currently working with Accenture as an Application Development Team Lead.

Career Experience:

- 7 years of hands-on experience in Robotic Process Automation (RPA) as an Application Development Team Lead – **Accenture**
- 3 years of hands-on experience in Robotic Process Automation (RPA) as a Senior Application Developer – **Cosset Technologies Pvt Ltd**

Relevant Experience Summary:

- RPA professional with 5+ years of experience in UiPath tool with one year of experience as Solution Architect and 10 years of Total IT experience.
- Good experience as Solution Architect overseeing development lifecycle and lead the development team.
- 2+ of experience in working with UiPath products like AI center, Document Understanding, Generative AI and agentic AI by LLM finetuning and AI driven automations.
- Experienced in RPA development across web, desktop, API, OCR, PDF, Excel, and Word environments in Finance and Healthcare domains.
- RPA (Robotic Process Automation) consultant with deep expertise in Automation technologies like UiPath, Blue Prism, Excel, Alteryx, C#.
- Lead end-to-end RPA solution design and delivery using UiPath, ensuring scalability and performance.
- Integrate Jenkins with UiPath for CI/CD pipeline automation, including build, test, and deployment.
- Manage source control using GitHub and Git Bash, enabling version control, branching, and collaboration.
- Configure and maintain UiPath Orchestrator assets, queues, and triggers for efficient bot operations.
- Review and optimize code, enforce best practices, and mentor junior developers across automation projects.
- Collaborate with cross-functional teams to align automation initiatives with business and IT goals.
- Strong experience in all phases of Software Development Life Cycle with Analysis, Design, Development, Implementation, Integration, Testing, Debugging, Production and Maintenance.
- Expert knowledge on Object Oriented Programming (OOP) concepts.
- Extensive experience in RPA automation tools- **Blue Prism**.
- Highly Experienced in Business process diagrams, process flow charts and Solution Design Document (SDD) with RPA tools.
- Automated Web Based and Desktop based applications using automation tool Blue Prism
- **Hands on good working experience on Blue Prism** - Work Queues configuration, monitoring and Internal Blue Prism Work Queue Actions, Stages like Action, Calculation, and Multi Calculation, Read, write, Code, Decision, Data item, Collection Stages, Exception, Recover, Resume stages, import and

export the Processes and Objects.

- Supporting existing processes and implementing change requirements as part of a structured change control process.
- Managing the user escalations directly and resolving issues.
- Implemented Blue Prism User authentication by defining user roles, creating users, and setting password policies
- Highly Experienced in Blue Prism **Queue Management, Session Management and Package and Releases**
- Extensively used Blue Prism's process studio and object studio to develop Business processes
- Worked on Spying Methods **UIA, AA, HTML Mode, Accessibility Mode, Region Mode, and Win-32 modes**
- Coding and configures automation process as per the technical designed document to meet the defined requirements.
- Hands on Performance Monitoring and Analysis of Applications and Application Environments
- Efficient in Database performance **monitoring, diagnostic and Tuning, Backup and Recovery, managing users and security.**
- Hands on experience with expertise in Support and Maintenance, Performance tuning, Import and Export, database upgrades and enhancements.
- Develop and document RPA configuration best practices, configure new RPA processes and objects using core workflow principles that are efficient, well structured, maintainable, and easy to understand.
- Capable of handling multiple tasks with changing priorities.
- A strong command of business analysis techniques including requirements gathering and documentation business outcomes user stories **functional design process flows, data analysis, logical database design.**
- Hands-on technical knowledge with **Excel VBA, macros** and analyze complex data to develop automated reporting using VBA and Excel
- Identifying process improvements and automation possibilities in existing projects.
- Used Advanced Excel capabilities, including pivot tables, lookups, complex formulas, and graphing to streamline business processes
- Programming macros to work with a huge amount of data and for **Excel reports**
- Support/Development for Data Migration of new customers into Lube Analyst using **SQL and Alteryx**
- Data validation based on Alteryx scripts using Excel files
- Loading data from excel files via **Alteryx scripts** into **MD SQL DB on Azure**
- Validating loaded data via Alteryx scripts and Enhancing Alteryx scripts
- Strong Experience in .Net Core, Entity Framework, **ASP.NET, VB.Net, jQuery, CSS, SQL Server, Ajax, OOPS**
- Extensive knowledge in **ASP.NET MVC, C#, JavaScript, jQuery, Ajax, Angular JS, Ajax, OOPS, HTML5, CSS, and SQL Server programming.**
- Capable in understanding and creating functional requirement specifications, technical design documents, and other UML diagrams
- Displaying readiness by adapting to change and working on innovative technologies
- Support existing processes and implementing change requirements as part of a structured change control process as well **as problem solving issues that arise in day to day** running of RPA processes and providing timely responses and solutions as required.

- Creating **error-free code** using the essential skills listed with minimal supervision.

Skills:

HTML, CSS, .net framework, Visual Basics (VB), Alteryx, Blue prism, C, C++, Excel VBA, MySQL, and AZURE Administrator.

Achievements:

- ❖ Achievement: **Annual Platinum Award** for outstanding contributions in achieving organizational goals 2018– **Accenture**
- ❖ Achievement: **Annual Platinum Award** for outstanding contributions in achieving organizational goals 2019– **Accenture**
- ❖ Achievement: **Annual Platinum Award** for outstanding contributions in achieving organizational goals 2023– **Accenture**

Certifications:

- ❖ Certified AD01 – By Blue prism
- ❖ Certified APD01 – By Blue prism
- ❖ UiPath Advanced Developer Training Diploma certificate.
- ❖ Certified Azure machine learning - By Microsoft
- ❖ Certified Alteryx designer core - By Alteryx
- ❖ Certified AZ-104 Microsoft Azure Administrator -By Microsoft
- ❖ Certified AZ-204 Developing solutions for Microsoft Azure – By Microsoft

Educational Qualification:

Bachelor of Technology from Jawaharlal Nehru Technological University, Hyderabad.

Professional Experience's

Incorporan Inc — Senior RPA Developer

New Jersey, United States | May 2025 – Present

RPA Developer – Finance & Supply Chain Automation

Project Overview:

Contributed to transformative finance and supply chain automation initiatives by conducting in-depth requirements analysis and feasibility studies, with a focus on maximizing process automation and reducing manual intervention. Developed high-quality bots to streamline workflows, delivering measurable time and cost savings for the organization. Provided ongoing production support and collaborated closely with QA teams to resolve defects during product testing and UAT phases.

Key Responsibilities:

- End-to-End Automation Delivery: Designed and implemented RPA solutions using both UiPath and blue prism, automating complex business processes across finance and supply chain functions for improved operational efficiency
- Process & Object Development: Built and maintained reusable process components and objects, adhering to best practices for structure, maintainability, and clarity.
- Bot Design & Testing: Engineered, tested, and refined automation workflows in UiPath, including modeling processes for Windows-based applications and validating them within UiPath Studio's

built-in controller.

- **Deployment & Orchestration:** Managed bot deployments, monitoring, and lifecycle management through UiPath Orchestrator, ensuring robust automation operations and rapid issue resolution.
- **Production & Hypercare Support:** Delivered post-launch support, promptly addressing production issues based on priority and leveraging logs for proactive monitoring and troubleshooting.
- **Cross-Functional Collaboration:** Worked with business and testing teams to identify automation opportunities, resolve bugs, and ensure seamless integration of automated solutions throughout the project lifecycle.

Accenture Pvt Ltd
Application Development Team Lead

October 2018 – May 2025

Client: Cigna

October 2018 to May 2025

Project Description:

To help the client processing medical reports and billings. This process is used to prevent manual intervention that involves iterative and repetitive work decision making manipulation the data and after processing necessary validation, creation processes we will do automated by using Blue Prism. I have done more than 20 RPA Process.

Role: Sr. RPA Platform Engineer & Developer

Environment: UiPath, **Blue Prism**, **.net Framework**, **Excel VBA**, and **Alteryx C#, SQL, REST API, JIRA, Test Suite**

Roles & Responsibilities:

- Automated processes like **Claims adjudication**, Provider data entry, Member enrolment or updates and Eligibility verification,
- Work with business teams to identify key automation areas and draft solution designs for new processes.
- Work as part of COE to develop best practices, coding standards, libraries and frameworks.
- Perform code reviews and assist other developers with troubleshooting and logical solutions.
- Work as senior RPA developer of Robotics team to develop and support automations related to insurance claims process.
- Work on **Production deployment and UAT support** and configure environments and settings and troubleshooting issues on Orchestrator and VMs.
- Automate manual tasks using UiPath to build automation workflows for **browser, desktop, API, image based (OCR)**, PDF and excel related tasks.
- Responsible for building and maintaining libraries and re-usable code components and assist other developers in improving efficiency, scalability and reusability.
- Also, part of Innovation team focusing on exploring other UiPath and AI tools which can be used in current automations to improve efficiency and make them robust.
- Responsible for maintaining the quality and standards of the bots through code reviews and creating documentation on code standards.
- Communicate with business team to gather requirements and perform analysis and feasibility study.
- Lead the end-to-end delivery of RPA projects using UiPath, managing a team of developers and ensuring quality automation outcomes.
- Collaborate with business stakeholders, SMEs, and project managers to gather requirements, design scalable solutions, and define delivery timelines.
- Serve as a technical escalation point for complex UiPath implementations and integrations.
- ◆ **Development & Best Practices**
 - Architect and develop robust UiPath workflows using Reframe work and modular design principles.

- Enforce coding standards, exception handling practices, and documentation protocols (PDD, SDD, and deployment guides).
- Conduct peer reviews, validate reusable components, and manage workflow libraries across projects.
- ◆ **CI/CD Integration (Jenkins, GitHub, Git Bash)**
 - Implement CI/CD pipelines using **Jenkins** to automate the build, test, and deployment lifecycle for UiPath processes.
 - Integrate **GitHub** as a centralized source control system for versioning, branching strategies, and code collaboration.
 - Use **Git Bash** for command-line operations such as cloning repositories, committing changes, and resolving merge conflicts during development cycles.
 - Automate packaging and deployment of UiPath projects (.nupkg) to **Orchestrator** via Jenkins pipelines and API scripts.
 - Ensure secure credential handling and encrypted asset transfers through environment variables or credential managers.
- ◆ **Orchestrator & Infrastructure**
 - Manage and configure **UiPath Orchestrator** assets, queues, triggers, and schedules to support high-availability bot execution.
 - Coordinate with infrastructure and DevOps teams for bot provisioning, licensing, and environment setups.
 - Monitor and analyze bot performance metrics, job logs, and orchestrator dashboards to ensure SLA compliance.
- ◆ **Mentorship & Team Enablement**
 - Mentor junior RPA developers on UiPath best practices, DevOps workflows, and version control techniques.
 - Conduct workshops on Git basics, branching strategies, and CI/CD implementation for RPA teams.
 - Promote a culture of automation, agile delivery, and continuous improvement.
- Responsible for developing and implementing automated processes using UiPath.
- Acquired knowledge in designing and implementing pipelines using Git Hub for continuous deployment. Verifying whether the automation is meeting all the requirements provided by clients.
- Explored and leveraged UiPath Autopilot for Developers to enhance automation development efficiency Integrated UiPath automation with Microsoft SQL Management Studio Conducted comprehensive analysis of automation pipeline to identify common functionalities across multiple projects, resulting in the design and implementation of reusable libraries that significantly improved development efficiency and code consistency.
- Collaborate and communicate with other technology partners to deliver excellent output. Worked with SMEs to create PDD (Process Definition Document) and developed separate SDD (Solution Design Documents).

Client: Ever north

Process: Automate Claims adjustments Sourced and updated from to Pega. Experienced in automating processes within the finance and procurement sectors. Proficient in streamlining operations to enhance efficiency and accuracy.

Technology: Skills: UiPath, Blue Prism, .net Framework, Excel VBA, and Alteryx.

Roles & Responsibilities:

- Worked on projects related to **invoices and receipts data extraction** using clustering and classification **using AI/ML** to classify documents in Document Understanding framework.
- Supports the RPA COE goals of business, Operations transformation, foundational capabilities, core development of the BOTS, setting up standards for coding, monitoring, and general best practices, and supporting program delivery.
- Supports one or more strategic RPA initiatives through all phases of the lifecycle. Has deep SME knowledge and proven delivery experience across multiple RPA technologies.
- Work on **Document Understanding framework** to extract data from invoices.
- Provides **RPA design, testing, training, and implementation support**.
- **Built reusable Python modules** for integration with Document Understanding, Intelligent OCR, and AI Center in UiPath, accelerating the deployment of smart automation bots.
- **Implemented RPA solutions combining Python AI models** (for NLP, classification, or sentiment analysis) with UiPath workflows to automate ticket triaging and customer support scenarios.
- Automate manual tasks using UiPath to build automation workflows for **browser, desktop, API, image based (OCR)**, PDF and excel related tasks Participates in integrating activities for successful implantation and support of project efforts.
- Reviews test results, document test activities, and record remedial actions.
- Ensures UiPath platform solution is implemented with UiPath best practice.

Client: Cigna

Technology: Blue Prism, UiPath

Project Description:**Roles & Responsibilities:**

- Develop the Bot through Application modular to find the elements.
- Analyzing the problems and implement the processes to improve.
- Develop decision flows for the Blue Prism robot to find the different application.
- Develop workflows for automating web-based application.
- Developed processes and deployed to User Acceptance Test (UAT) to evaluate and collaborated with controllers to deploy solutions to the production.
- Designed and documented the Naming conventions for all the Pages, Sub-Processes in each process and all the Action Names for each of the Business Object, taking Process Diagrams (PDD) as the Source.
- Following coding standards and security practices.
- Worked on Integrating applications like (Web, Services, Mainframe, MS Office, GUI, Outlook.) using workflow, automation tools (Blue Prism).
- Developing the assigned User Stories, maintaining all the blue prism Standards optimization to delivery.
- Work on using Blue Prism's Credential Manager for maintaining, securing, and retrieving the user credentials
- Reviewing & fixed Business Process Production issues.
- Mentoring junior developers and performs code reviews for quality control.

Client: Deloitte

Technology: Alteryx

Project Description: Automate the comparison of financial guarantee settlement reports run at period close and just before payment.

Roles & Responsibilities:

- Understand client requirements and build Extract, Transform and Load (ETL) solutions using Alteryx jobs to perform all business rules.
- Prepared technical specifications and documentation for Alteryx workflows supporting BI reports
- Work closely with the Business Analysts in identifying and defining requirements
- Worked on Data & appropriate teams to effectively source required data.
- Hands-on skills and experience in Alteryx Designer, Alteryx Server, and the tools within Alteryx such as Predictive, Parsing, and Transforms
- Developed data workflows using Alteryx
- Design and develop ETL workflows and datasets in Alteryx
- Automated data processing and transformations
- Performed multiple joins, work with multiple datasets to automate/manipulate data extracts
- Performed end to end automated data validations using Alteryx
- Conduct unit tests and develop database queries to analyze the effects and troubleshoot any issues that arise.

Client: Deloitte

Technology: .net Framework and Excel VBA

Project Description: Simplify Process to apply manufacturer and wholesaler refunds for Expired merchandise. Extracting invoices pdf files and generate output file send excel file via outlook. Creating macro by using Microsoft Visual basic using for generating automatic calculations in the spreadsheet.

Roles & Responsibilities:

- Developing C# .NET solutions for the organization. Programming in-house applications using the .NET framework.
- Debugging and maintaining written code.
- Defining and organizing projects on an ongoing basis.
- Reporting and resolving issues related to .NET projects.
- Identifying and managing technical risks and issues.
- Working in a project team alongside other developers.
- Providing technical support to stakeholders in the organization.
- Reporting on project statuses and developments to senior team members.
- Participating in project meetings with management and other team members.

Cosset Technologies Pvt Ltd

November 2015 - October 2018

Designation: Software Engineer

Role : RPA Developer

Tools : Blue prism.

Project Description:

Stella and Dot is a San Francisco based social selling company that creates flexible entrepreneurial opportunities for women, boutique-style jewelry and accessories line is available exclusively through in-home Trunk Shows by Independent Stylists and online. one-of-a-kind collections are designed by

celebrated New York designers and featured in Gossip Girl, In Style and Lucky Magazine as well as on the wrists and necklines of today's hottest celebrities. The Today Show, Wall Street Journal and The New York Times have praised Stella & Dot for innovative social shopping concept which brings together the best of ecommerce, social media, personal service, and enthusiastic earning to create the ultimate home-based business for today's modern woman.

Roles & Responsibilities:

- Work closely with the business in gather the requirements and converting them into technical requirements
- Provided End to End solution for based on the requirements. Business process using Robotic Process Automation using Blue Prism
- Participate in Daily scrum meeting along with development team and business team
- Work collaboratively with test teams during the Product test and User Acceptance Test (UAT) phases to fix assigned bugs with quality.
- Moving the designed process to UAT machine and then after successful test, importing them to repository manager for production.
- Helped the team to design the actions for Business Objects which have more than actions for each BO.
- Designed and documented the Naming conventions for all the Pages, Sub-Processes in each process and all the Action Names for each of the Business Object, taking Process Diagrams (PDD) as the Source.
- Coordinating with the operational teams during the UAT and roll-out.
- Analyze and understand business processes.
- Participated in creating and delegating Decision Rules.
- Participated in designing UI screens and Implementing Validations.
