

Nikhil Reddy Kethireddy

Dotnet Developer

+1 913-538-2211 ◇ kansas, United States ◇ [LinkedIn](#)

SUMMARY

Accomplished Dotnet Developer with 4+ years of experience in C#, .NET Core, ASP.NET MVC, and RESTful APIs. Proficient in SQL Server, Entity Framework Core, and LINQ, complemented by front-end collaboration using JavaScript, Angular, and React. Strong expertise in Azure Cloud, with demonstrated knowledge of Docker, Terraform, and CI/CD pipelines, ensuring adherence to security best practices such as JWT, OAuth, and RBAC. Holds a Master's in Computer Science and a passion for building scalable, secure, and high-performance applications, adept at managing multiple project deliverables efficiently with modern DevOps practices and problem-solving capabilities.

EXPERIENCE

Dot Net Developer CVS Health Ltd

Jun '24 — Current
United States

- As an Intermediate .NET Developer, responsible for designing, developing, and maintaining web and desktop applications using C#, ASP.NET, .NET Core, and MVC architecture. Focused on building scalable, high-performance solutions that meet business requirements while ensuring a seamless user experience.
- Tasks included optimizing SQL Server databases for performance, security, and query efficiency, and integrating and developing RESTful APIs to extend application functionality.
- Collaborated with front-end developers to ensure smooth integration of back-end logic with responsive UI/UX components. Managed the deployment and scaling of applications on cloud platforms such as Azure and AWS to ensure efficient production environments. Participated in code reviews to maintain high standards of code quality and best practices.

Dot Net Developer Magna Infotech

Jan '19 — Jun '22
India

- This role involves developing and maintaining web applications using C#, .NET Core, and ASP.NET MVC. Key responsibilities include building RESTful APIs, managing databases with SQL Server and Entity Framework Core, and collaborating with front-end teams using JavaScript, Angular, or React. Debugging, troubleshooting, and optimizing application performance are essential tasks.
- The position requires experience with Git, CI/CD pipelines, and Agile methodologies. Knowledge of microservices architecture, authentication, and security best practices is beneficial. Familiarity with Azure/AWS, Docker, Kubernetes, and API integrations adds value. Strong problem-solving skills and attention to detail are important for ensuring system efficiency and reliability.
- Code reviews and collaboration with team members help maintain quality standards. Writing clean, maintainable, and scalable code is a priority. Experience with unit testing, automation, and DevOps practices is useful. The role provides opportunities to work with modern .NET technologies and improve development skills.

EDUCATION

Master in Computer Science, University of Central Missouri
Bachelor in Computer Science And Engineering, Nalla Malla Reddy Engineering Collage

Aug '22 — May '24
Aug '16 — Sep '20

SKILLS

Core .Net C+, ASP.NET Core, .NET Framework, .Net Core, EF core, LINQ, WPF, Blazor

Data Management SQL Server, MySQL, Oracle NoSQL Database, Dapper, SSRS

Cloud & DevOps Azure Cloud Services, S3, API Gateway, Lambda, SQL, Key Vault, RDS, Azure DevOps, Github actions, Docker, **Security & Authentication** JWT, OAuth, ASP.NET Identity, Role-Based Access Control, Claim-based, OWASP
