SUMMARY

An accomplished Senior Software Engineer with 8 years of hands-on experience in .NET development, specializing in backend architecture, API integration, and cloud solutions. Skilled in managing teams, optimizing performance, and delivering high-quality integration solutions. Looking to contribute to a forward-thinking organization where I can apply my expertise in Azure DevOps, .NET Core, and SQL Server to solve complex technical challenges and lead software development initiatives.

EXPERIENCE

Senior Software Engineer

K M Technology (Alluvia Platform)

August 2023 - Present, Ahmedabad, Gujarat

- Lead and manage two junior development teams, guiding them in building robust, flexible, and cost-effective data integration solutions tailored for mid-market clients.
- Spearhead the design and development of scalable integration architectures using Azure DevOps, .NET Core, Web API, and SQL Server, ensuring seamless integration with ERP systems and other business applications.
- Ensure the ongoing maintenance and improvement of backend systems, emphasizing system performance, scalability, and security.
- Developed and optimized Web API solutions, enhancing the interoperability between ERP systems and external platforms, leading to improved data accuracy and faster processing times.
- Developed and optimized Web API solutions, enhancing the interoperability between ERP systems and external platforms, leading to improved data accuracy and faster processing times.

Senior Software Engineer

C-Metric Solutions Pvt. Ltd

August 2018 - July 2023, Gandhinagar, Gujarat

- Identify creative solutions and workflow optimizations to improve deployment timelines and reduce project roadblocks during development lifecycles.
- Designed, modified and implemented technology solutions for clients.
- Worked to meet the specific needs of clients through groundbreaking software solutions.
- Communication with clients on application development project status, new project proposals, and software-related technical issues.
- Manages team of 2 junior software engineers.
- Tests and debugs software, ensures cross-platform compatibility, and search engine optimization.
- Writes clean code for front-end and back-end software.
- Collaborate with team to brainstorm and create new products.

Junior Software Engineer

Innopad Solutions LLP

July 2016 - July 2018, Ahmedabad, Gujarat

- Developed web forms in ASP.NET using C# as the code-behind language and LINQ as the SQL data consumer.
- Used ADO.NET objects such as Data Adapter, Data Reader, Dataset and Data List for reading/updating records in the database.
- Prepare and install solutions by determining and designing system specifications, standards and programming.
- Document and demonstrate solutions by developing documentation, layouts, charts, code comments and clear code.
- Developed master pages, Ajax Controls and Involved in creation of stored procedures in MS SQL Server 2005.
