- Solution Architecture

Experience

10/2021 - Current
Automation Consultant, **Deloitte**, Jacksonville, FL

- Led automation teams within consulting contracts valued at $720M and $45M, delivering enterprise-grade automation for large-scale clients.
- Launched 10 automations within the first year, saving 6,000 employee hours annually for the client.
- Interviewed, hired, and mentored 5 automation developers, increasing capacity and accelerating delivery across multiple teams and projects.
- Drove automation adoption across 5 departments at the FDIC, streamlining workflows and increasing efficiency.
- Pioneered advanced automation at the FDIC, including unattended, long-running, and AI- or ML-infused processes (Open AI, AI Builder, Document Understanding).
- Established Automation Centers of Excellence for multiple clients, enabling scalable automation adoption and governance.

10/2018 - 10/2021
Automation Developer & IT Generalist, **Natural Life**, Ponte Vedra Beach, FL

- Founded and led the company's Center of Excellence for Automation, driving RPA adoption and governance across all major departments.
- Developed automation processes using UiPath tools to streamline operations in critical areas, such as accounting and customer-facing workflows.
- Integrated UiPath into the company tech stack, enabling seamless automation across business processes, and improving scalability.
- Managed, deployed, and updated unattended automations and software, ensuring continuous operation with 99.9% uptime.
- Engineered and led the migration to a cloud-based data warehouse, enhancing data accessibility and system performance.
- Implemented RPA best practices for security and process integrity, improving compliance, and reducing automation failures.

Education

04/2019
Bachelor Of Science, Computing and Information Sciences
University Of North Florida, Jacksonville, FL

- Minor in Business Management

Certifications

UiPath - Automation Developer Professional (UiADP)

Microsoft - Power Platform Fundamentals (PL-900)
