

Yashesh Bhavsar

Technical Project Manager | Project Manager (PMO & Delivery)

Mahesana, Gujarat, India | yashbhavsar829@gmail.com | +91 8866312186 | linkedin.com/in/yashesh-bhavsar

PROFESSIONAL SUMMARY

Technical Project Manager with 10+ years in IT and 5+ years managing full SDLC delivery for enterprise Web, Mobile, eCommerce, AI, and Microsoft 365 projects. Delivered 10+ enterprise engagements while leading cross-functional teams of 15-20+ across distributed, multi-timezone environments. Experienced in PMO governance and project operations, including project mobilization activities, delivery and quality reporting, RAID and change control, resource/capacity planning, stakeholder governance, escalation management, KPI tracking, executive reporting, and quality and security controls oversight across the delivery lifecycle. Strong in Agile, Scrum, Kanban, Waterfall, and hybrid delivery, with a technical foundation across .NET, Blazor, Umbraco, uCommerce, Angular, React.js, mobile platforms, APIs, and Microsoft 365.

CORE COMPETENCIES

- PMO Governance & Project Operations | PMO Mobilization & Run | Program / Project Management
- Delivery Governance | SDLC (Agile, Scrum, Kanban, Waterfall) | Scope, Schedule & Milestone Management
- Stakeholder & Executive Management | Risk, Issue, Assumption & Dependency (RAID) Management | Change Control
- Resource & Capacity Planning | Budget Tracking | KPI / Status Reporting | Governance Cadence & Escalation Management
- Microsoft 365 | SharePoint Online | Power Apps | Power Automate | Azure DevOps | Jira | Confluence
- Release Management & CI/CD Coordination | Quality Assurance & UAT Coordination | RCA | Technical Design & API Integration Reviews
- Quality & Security Controls Oversight | Compliance-Aligned Delivery Governance | Cross-functional Team Leadership
- Global Delivery Management | AI-Enabled Solution Delivery | Digital Transformation
- Technical Exposure: .NET, Blazor, Umbraco CMS, uCommerce, Angular, React.js, Android, iOS, React Native, Flutter, Xamarin

PROFESSIONAL EXPERIENCE

Technical Project Manager

Feb 2023 – Jul 2026

Kernshell Technologies Private Limited

- Managed end-to-end delivery of 8+ enterprise projects across Web, eCommerce, and Microsoft 365 platforms for US clients, leading cross-functional teams of 20+ developers, QA engineers, UI/UX designers, business analysts, DevOps engineers, and solution architects.
- Supported PMO/project mobilization and run activities by establishing delivery plans, governance cadence, escalation paths, reporting practices, resource allocation, project controls, RAID tracking, and stakeholder communication across concurrent engagements.
- Defined project scope, budgets, milestones, and success criteria; tracked delivery metrics, KPIs, and burn-down charts through Azure DevOps and Jira, and produced governance and status reporting for leadership and clients.
- Ran full SDLC delivery using Agile (Scrum), Kanban, and Waterfall; coordinated sprint planning, daily stand-ups, backlog grooming, retrospectives, and project reporting.
- Served as point of contact for international clients across time zones, presenting status reports, managing expectations, and driving issue resolution, escalation, and delivery decisions.
- Built and maintained project plans, schedules, and resource/capacity allocation across concurrent engagements, adjusting team capacity as priorities and deadlines shifted.
- Owned release management and delivery governance for production deployments and hotfixes, coordinating with DevOps on CI/CD, deployment strategy, rollback planning, quality gates, security controls, and production readiness.
- Led solution architecture discussions with engineering teams, reviewing technical designs, API integrations, quality standards, security controls, and system dependencies before release to identify risks early.
- Handled RAID management and change control; coordinated QA, quality reviews, UAT, regression testing, and root cause analysis for production issues.
- Flagged risks and blockers early, coordinated mitigation plans, and escalated critical items through defined escalation paths with clear impact and recommended actions.
- Managed Microsoft 365 initiatives spanning SharePoint Online, Microsoft Teams, Power Apps, and Power Automate, including access and security controls, and drove adoption across business units.

- Facilitated scope and change-request discussions with clients and internal teams so project baselines and stakeholder expectations remained aligned.
- Supported pre-sales work with effort estimation and solution proposals, and mentored project teams on Agile practices, quality standards, and process improvement.
- Delivered an AI-powered chatbot and calling solution; owned requirements gathering, client sign-off, quality validation, and post-deployment monitoring.

Project Manager

Feb 2022 – Dec 2022

Voing Technologies LLP (sister company of Dash Technologies Inc.)

- Managed end-to-end delivery of 2+ enterprise Web and Mobile projects, leading cross-functional teams of 10+ developers, QA engineers, UI/UX designers, business analysts, DevOps engineers, and solution architects.
- Built project plans, timelines, and effort estimates across project phases and acted as the primary stakeholder liaison for expectations, status, risks, escalations, and delivery decisions.
- Owned full project lifecycle delivery aligned to business objectives and reported success criteria, quality and testing outcomes, and deployment status to leadership.
- Created delivery templates and governance reporting practices that were adopted more broadly across the PMO.

Project Manager

Jan 2021 – Feb 2022

Dash Technologies Inc.

- Managed day-to-day delivery for multiple project teams, building timelines, assigning tasks, and tracking progress against organizational goals.
- Planned and prioritized sprint backlogs with business stakeholders and ran status meetings and progress reviews to identify blockers and escalate them early.
- Served as the bridge between engineering teams and clients, translating business requirements into actionable development tasks.
- Trained and mentored team members on technical confidence, product knowledge, and client communication.

Mobile Team Lead / Android Developer

Sep 2016 – Jan 2021

Dash Technologies Inc. | Red Turtle India | Genx Infotech

- Led Android application delivery using MVC/MVVM/MVP and guided teams on debugging, quality checks, and crash reporting.
- Built Android applications using Retrofit REST/SOAP APIs, Firebase/MySQL, push notifications, Google Maps, video conferencing, BLE/NFC, and related mobile technologies.

Android Developer (Freelance)

Jan 2016 – Mar 2017

Freelance Projects

- Delivered Android applications for independent clients end-to-end, from requirements gathering through UI development and deployment.

CERTIFICATIONS

- Scrum Fundamentals Certified (SFC) — SCRUMstudy, Issued Nov 2022
- Scrum: The Basics — LinkedIn Learning, Issued Nov 2022

EDUCATION

- Master of Computer Applications (MCA) — Gujarat Technological University, Ahmedabad, 2020
- Bachelor of Computer Application (BCA) — Hemchandracharya North Gujarat University, Mehsana, 2008 – 2011
